Art Unit: 2871

The previous restriction has been dropped in favor of this new restriction. Applicants addition of a new set of claims to different embodiment has neccesitated this newly presented restriction.

***Election/Restriction***

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species group 1

- 1) digital camera claims 22, 27-32
- 2) endoscopes 33,64
- 3) binoculars 34
- 4) spectacles claim 35
- 5) zoom lens 50
- 6) variable focus lens 57-59
- 7) variable prisms claim 24

Species group 2

- 1) ferroelectric liuqid crystal devices
- 2) polymer dispersed liquid crystal devices
- 3) cholesteric liuqid crystal devices
- 4) nematic liquid crystal devices

Art Unit: 2871

Applicant is required under 35 U.S.C. 121 to elect a **single disclosed species of each group 1 and 2** for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic. If applicants believe the species cluster into 3 or 4 substantially similar groups, applicant may recommend some substantially similar species to be examined with the elected species. Applicant may also suggest that a claim or some claims are generic, and may add generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
